1 Feed cord through ring. For extension rod socket assembly only remove the nut/balancer and washer. Leave nut on extension rod

2 Pull cord until socket bottoms out. Socket assembly with extension rod ensure nut is below ring before proceeding to step 3 (lock washer and nut/balancer)

3 Feed lock washer and nut/balancer through cord.

4 Firmly tighten socket to shade ring.

5 Twist off end cap from cable coupler and feed aircraft cable.

6 Completely feed aircraft cable through coupler, until stop is reached.

7 Hold coupler end cap inside canopy.

8 With screw supplied fasten coupler end cap from back of canopy.

9 Same as Step 8.

10 Twist and tighten coupler with aircraft cable to coupler end cap.

11 Same as Step 10.

12 Feed aircraft cable through backside center hole of canopy cover.

13 Same as Step 12.

14 Pass aircraft cable through one hole of strain relief.

15 Loop same end of aircraft cable through balancer.

16 Continue to feed aircraft through remaining opening of strain relief.

Tighten both screw of strain relief and adjust aircraft cable length as needed. Cut loose aircraft cable if necessary.

Same as step 17.

Feed powercord through off center hole of canopy cover.

Same as step 19.

Pass power cord through strain relief (black) and twist to tighten power cord. Adjust length of power cord prior to tightening.

Same as step 21.

**WARNING – PLEASE READ ALL INSTRUCTIONS PRIOR TO INSTALLATION.
READ AND FOLLOW ALL WARNINGS AND INSTRUCTIONS BEFORE INSTALLING OR MAINTAINING THIS PRODUCT.
TURN OFF POWER PRIOR TO ANY WORK ON THE SYSTEM OR PRODUCT.
DO NOT INSTALL DAMAGED PRODUCT.**

Installing, wiring, and maintenance must be done by qualified persons or a certified electrician in accordance with all local and National Electrical Codes.

Warranty is voided in case of unauthorized modifications and/or improper use.

Save these instructions and refer to them when additions, changes, or services to the fixture or system are made.

CAUTION – Do not install any fixture assembly closer than 6 inches (15.24cm) from any combustible material (insulation).

Refer to product label for voltage requirements and properly ground fixture in accordance with all local and national electrical codes.

Product will support dimming with compatible lamp and dimmer.

Suitable for dry locations.

DO NOT use chemicals or water to clean shade, ONLY use DRY cloth.

Must use suspension kit (p/n: K20263) when provided.

120 VAC input
Max 100W lamp

⚠ WARNING ⚠

- To avoid possible electrical shock, before installing light fixtures, disconnect power by turning off the circuit breakers both to the outlet box and to its associated wall switch location if you cannot lock the circuit breakers in the off position, securely fasten a prominent warning device, such as a tag to the service panel.
- Verify that supply voltage is correct by comparing it with the luminaire label information.
- Make all electrical and grounded connections in the accordance with the National Electrical Code (NEC) and any applicable local code requirements.
- Allow sufficient time for fixture and / or driver to cool before servicing and performing maintenance.

⚠ ADVERTENCIA ⚠

- Para evitar un posible choque, antes de instalar luminarias, desconecte la alimentación apagando los interruptores de circuito y ubicación del interruptor de pared. Si no se pueden bloquear los interruptores en la posición de apagado, sujetar un dispositivo de advertencia en el panel de servicio.
- Compruebe que la tensión de alimentación es correcta comparándola con la información de etiqueta de la luminaria.
- Hacer todas las conexiones eléctricas y puesta a tierra de acuerdo con el código eléctrico nacional (NEC) y los requisitos del código local aplicable.
- Permitir suficiente tiempo para el luminario y el controlador para enfriar antes de empezar el servicios y mantenimiento.

⚠ AVERTISSEMENT ⚠

- Pour éviter les chocs, avant d'installer des appareils d'éclairage, coupez l'alimentation en désactivant les disjoncteurs et l'emplacement du commutateur mural. Si vous ne pouvez pas verrouiller les disjoncteurs en position d'arrêt, fixer un avertissement sur le panneau de service.
- Vérifiez que la tension d'alimentation est correcte en le comparant avec les informations d'étiquette de luminaire.
- Effectuer tous les raccordements électriques et mise à la terre dans la conformité avec le Code électrique National (NEC) et des exigences du code local applicable.
- Laisser suffisamment de temps pour l'appareil et pilote refroidir avant d'effectuer l'entretien et la maintenance.

⚠ CAUTION ⚠

- All wiring must be in accordance with national and local electrical codes and ANSI/NFPA 70. If you are unfamiliar with wiring you should use qualified electrician.
- PPE Personal Protective Equipment such as gloves and safety glasses should be used at all times when installing, maintaining or servicing.
- Risk of fire. Keep combustible material away from fixtures.

⚠ PRECAUCION ⚠

- Todo el cableado debe hacerse de conformidad con los códigos eléctricos nacionales y locales y ANSI/NFPA 70. Si no está familiarizado con el cableado, se debe utilizar a un electricista.
- Equipo de protección personal como guantes y lentes de seguridad se debe utilizar al instalar, mantener o reparar.
- Riesgo de incendio. Mantenga los materiales combustibles lejos de los luminario.

⚠ MIS EN GARDE ⚠

- Tout le câblage doit être effectué conformément aux codes électriques locaux et nationaux et ANSI/NFPA 70. Si vous êtes peu familier avec câblage, vous devez utiliser un électricien qualifié.
- Équipement de protection personnelle comme des gants et des lunettes de sécurité doivent être utilisés en tout temps lors de l'installation, maintenance ou entretien.
- Risque d'incendie. Garder les matières combustibles loin de luminaires.
